

# History of MML (Medical Markup Language) and its application for EHR (Dolphin Project) in Japan

Professor of Kyoto University  
CIO of Kyoto University Hospital

Hiroyuki Yoshihara, MD/PhD

# Longest and the final day of my academic life as a Professor

- Dept. of Medical Informatics in Kyoto University Hospital

- Design School

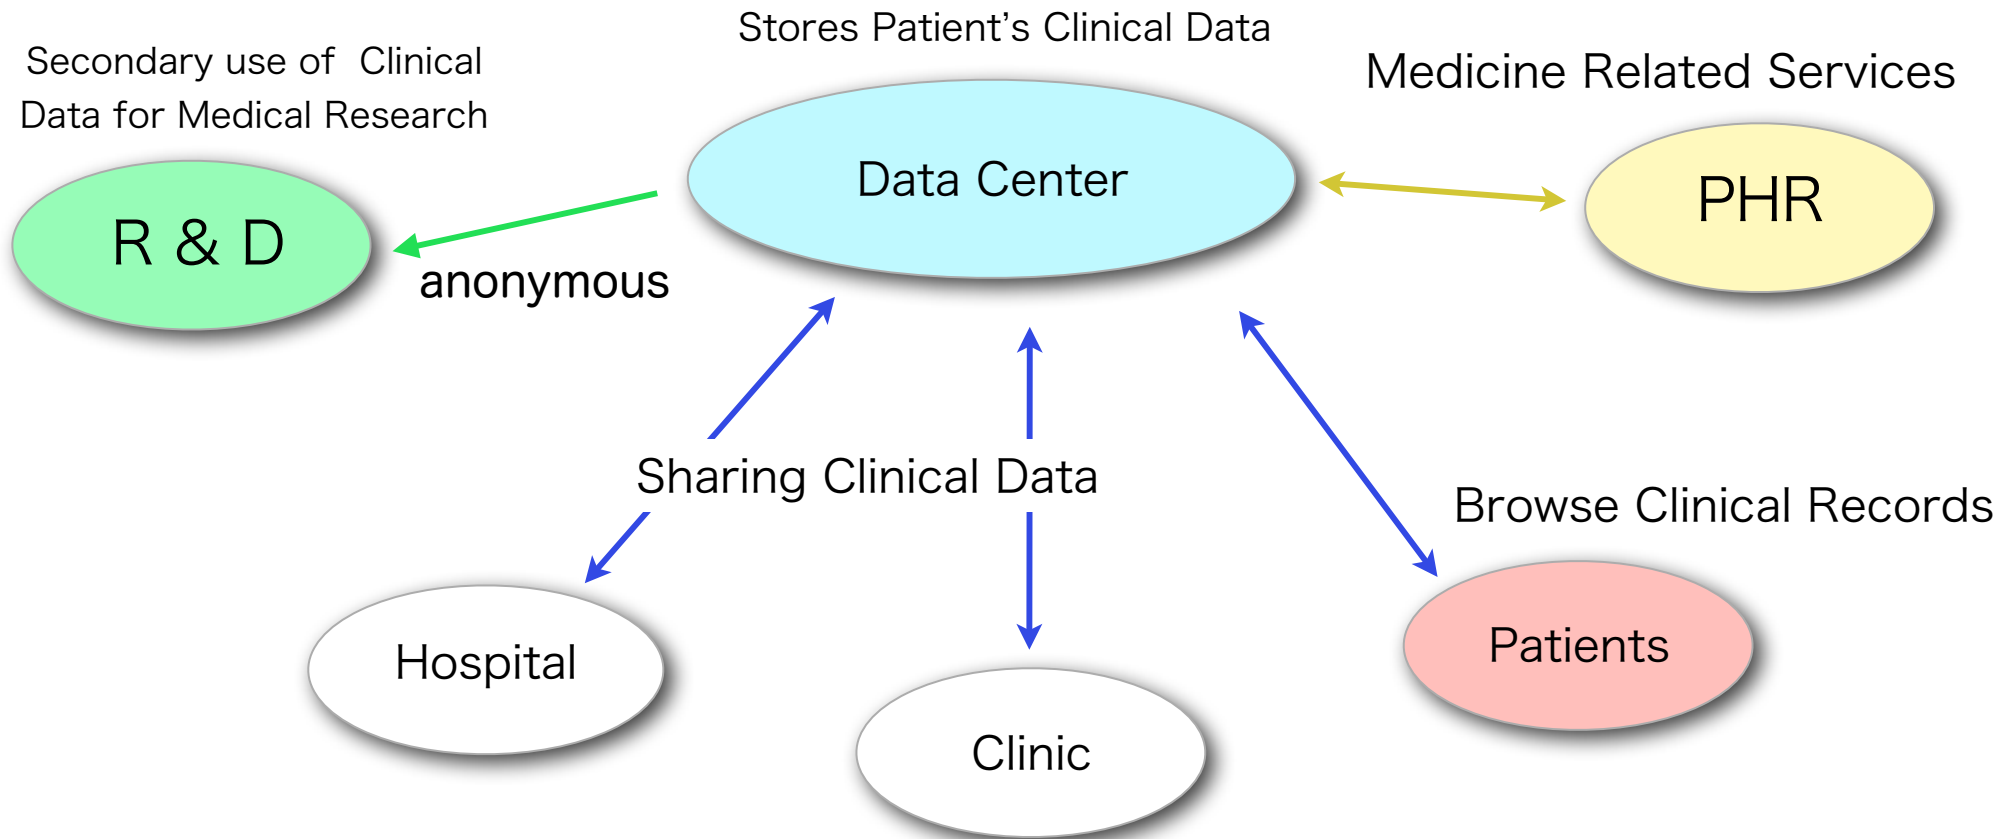

# Kyoto University Hospital

- ✦ 1,121 beds
- ✦ Approx. 33 departments
- ✦ 500 Physicians, 900 Nurses
- ✦ 2500-3000 out-patients per day
- ✦ Mean Hospital Stay: 15days
- ✦ Mean number of in-patients: 1000
- ✦ Hospital Income: 31 billion yen/year

by Google Earth

# Concept of Dolphin Project

Data Centers for accumulating information are established in each region. Corresponds to model centered on the RHIO (Regional Health Information Organization) in the U.S.

# History of Dolphin Project

---

1995 MML (Medical Markup Language) project had started

1996 MML 1.0 (using SGML)

1997 Concept of Global EMR: Global Medical History Database (GMHD)

1998 idea of Dolphin Project

1999 MML 2.0 (using XML)

2001 Dolphin Project had started

2002 MML 3.0 (using CDA rel.1)

iDolphin Service available (=RHIO)

Haniwa Project (Miyazaki), Higo-Med Project (Kumamoto)

2003 HOT Project (Tokyo)

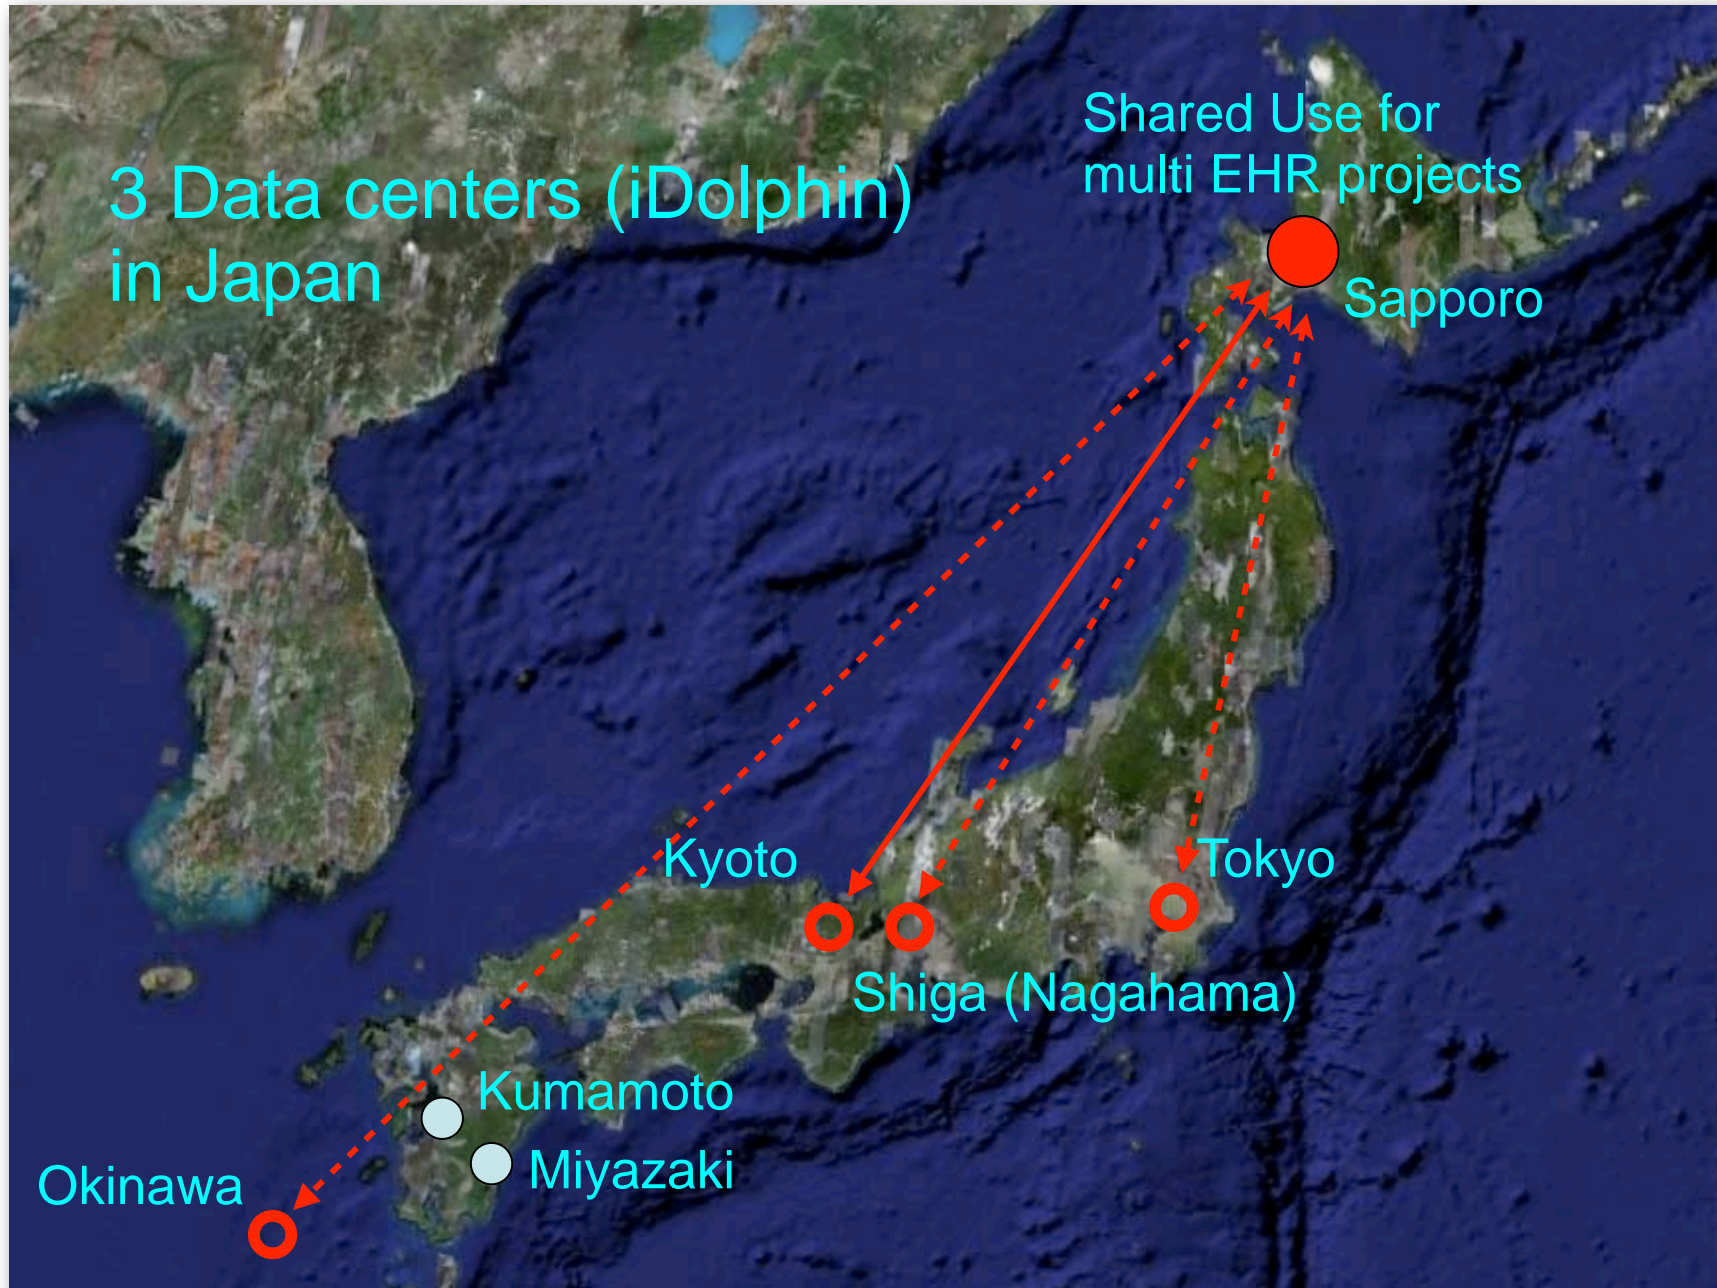

2006 Data Center was established in Kyoto (Maiko Net)

Super Dolphin available (=NHIN)

2007 Maiko Net service started (Kyoto University Hospital)

2008 Service for Mobile Phone started

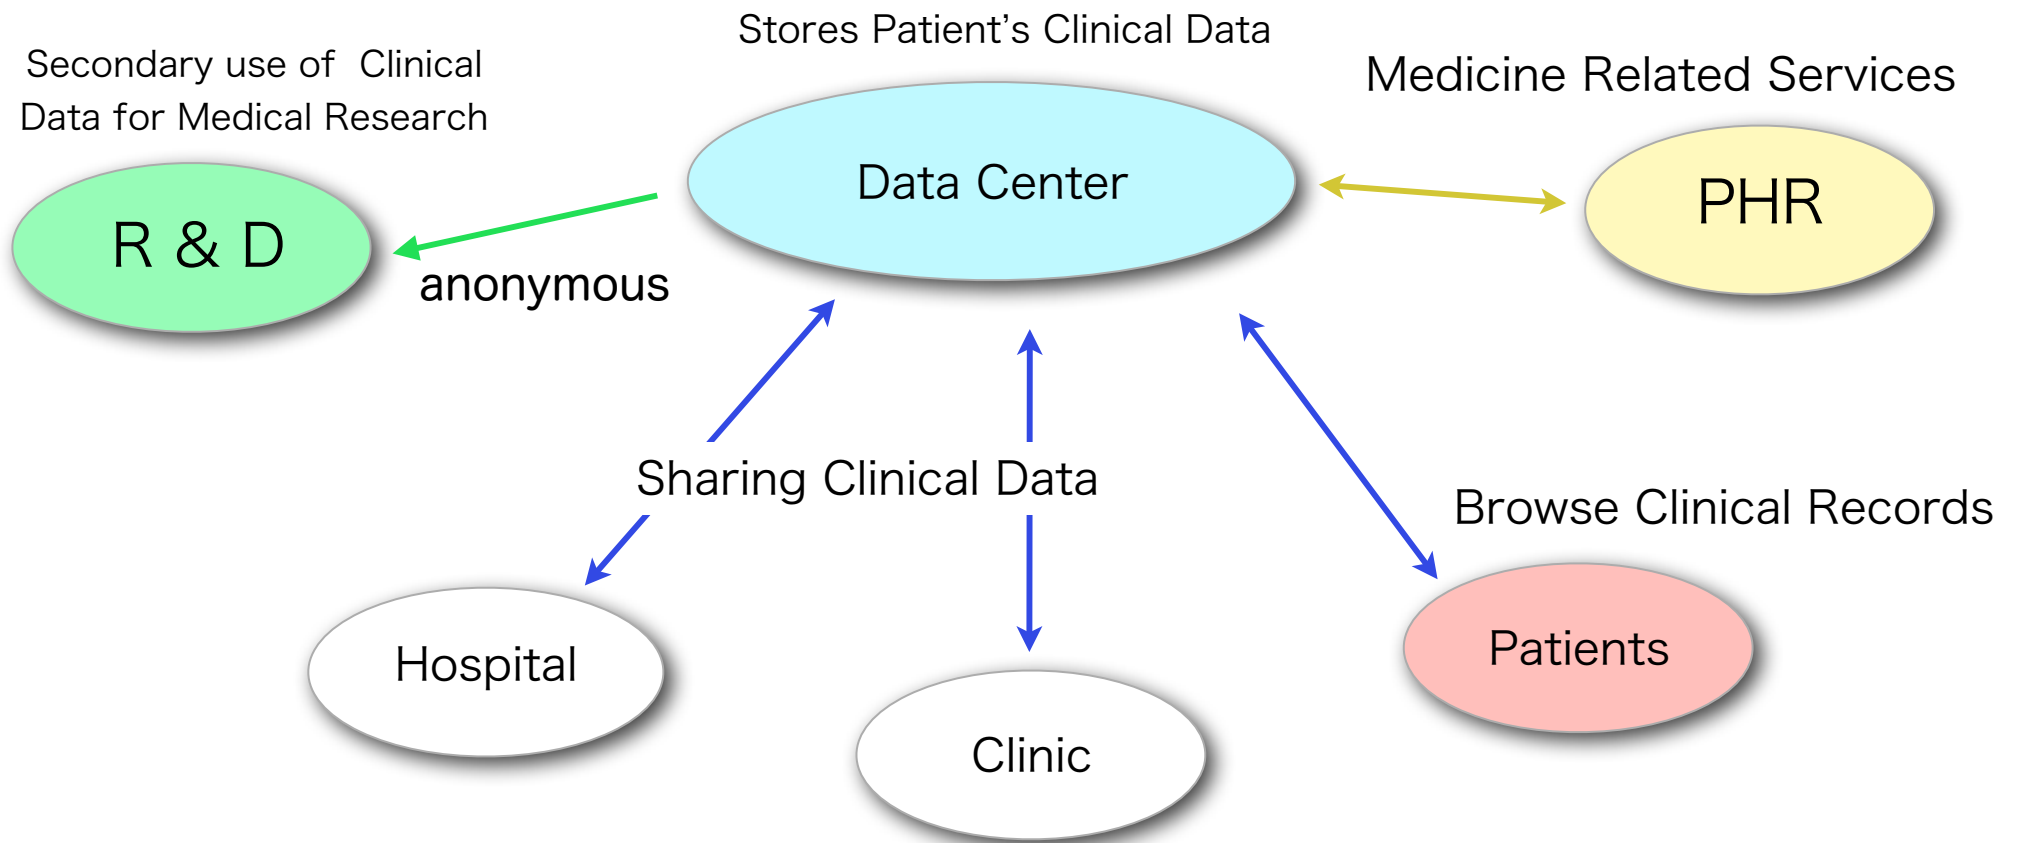

2012 Service for iPad started

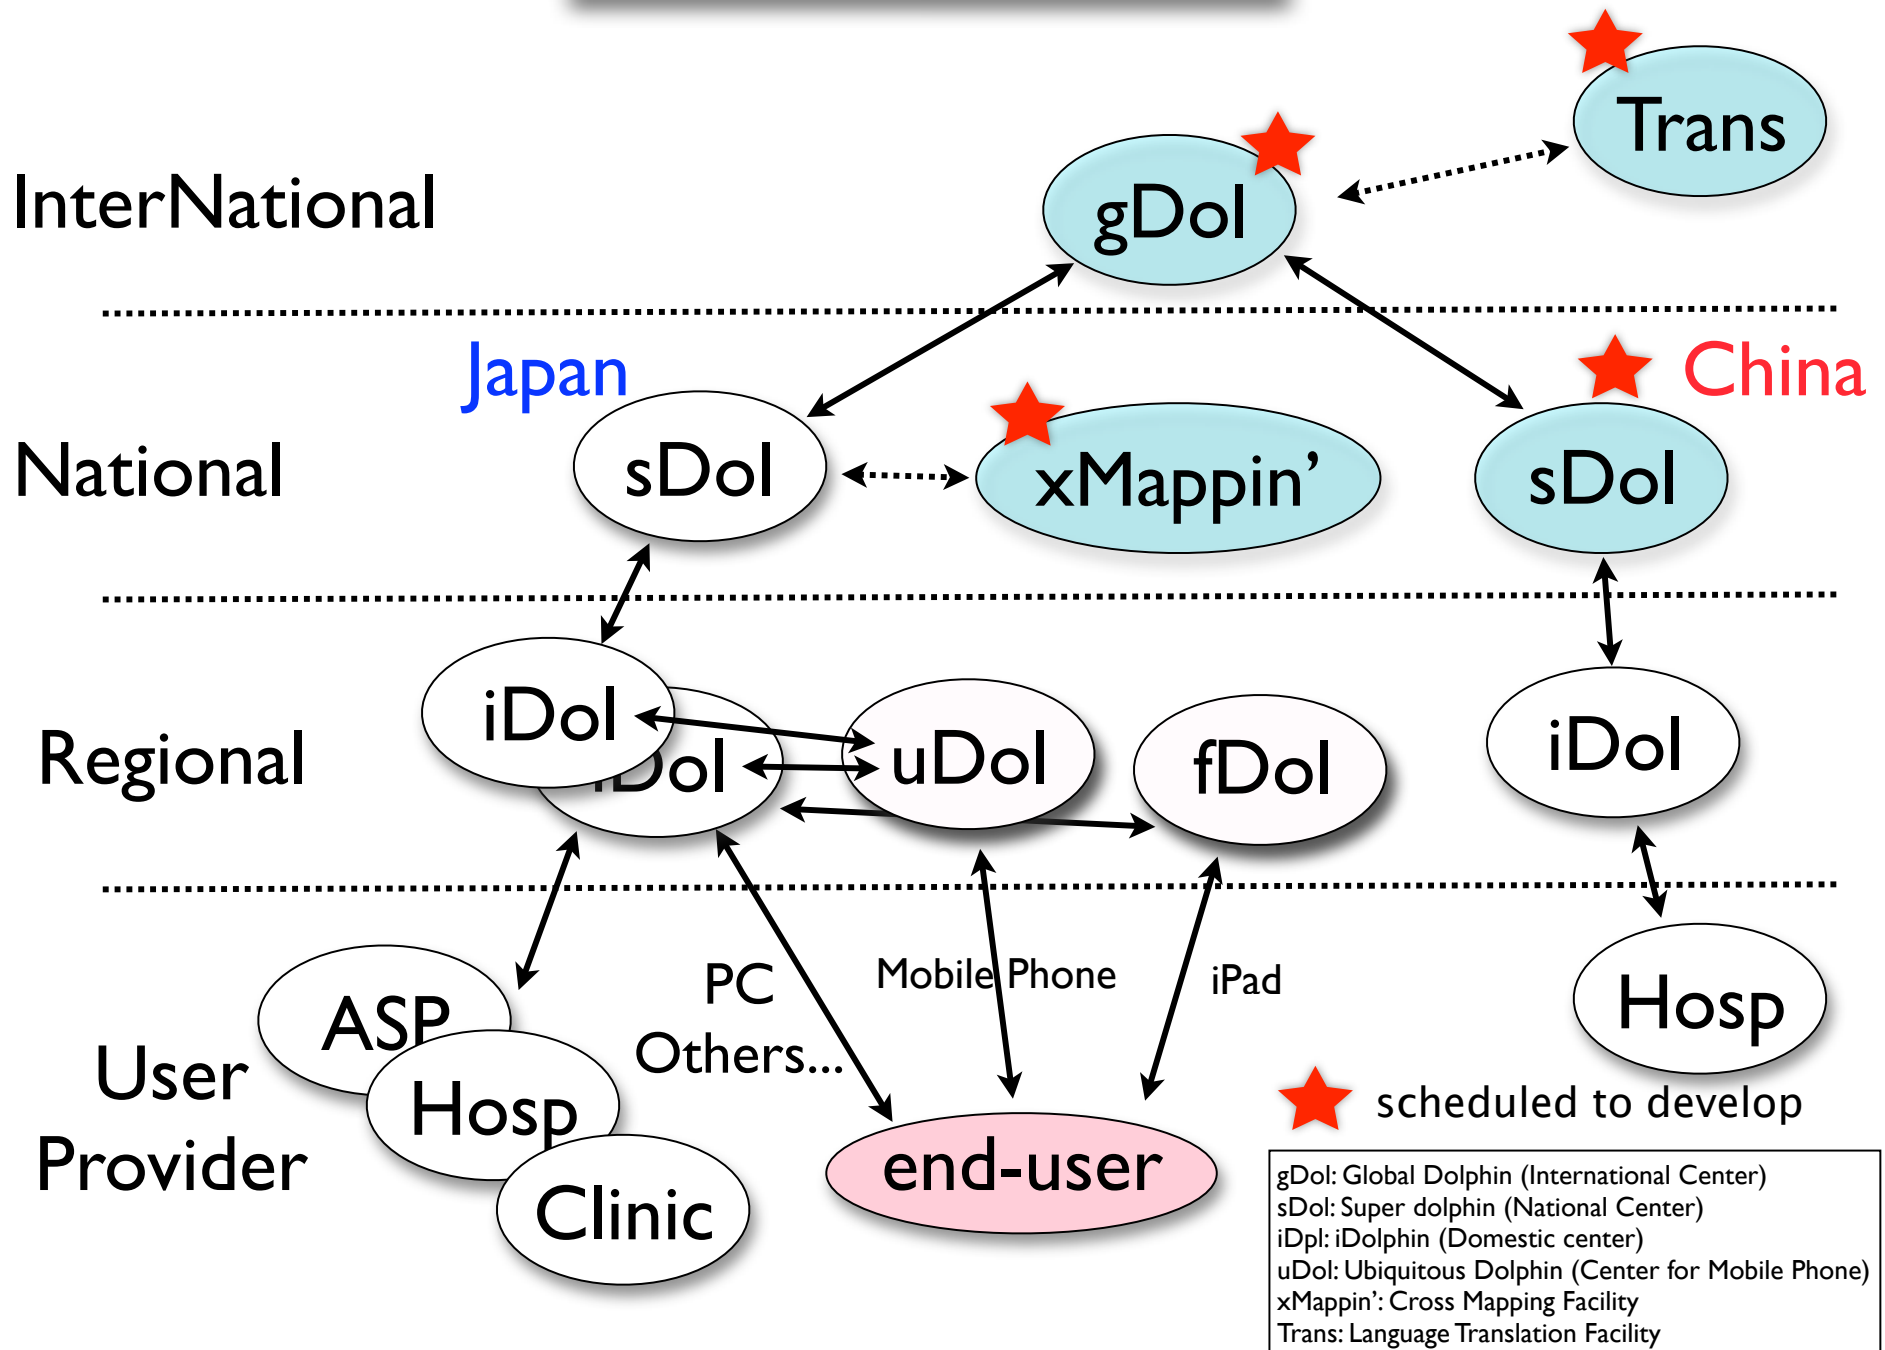

by Google Earth

# Services of iDolphin

- 1) Disclosure Clinical Records for Patient (B2C)
- 2) Sharing Clinical Record between Medical Institutions (B2B)
- 3) Anonymous Clinical Data for Medical Research (B2R)

# Scheme of Dolphin 4.0

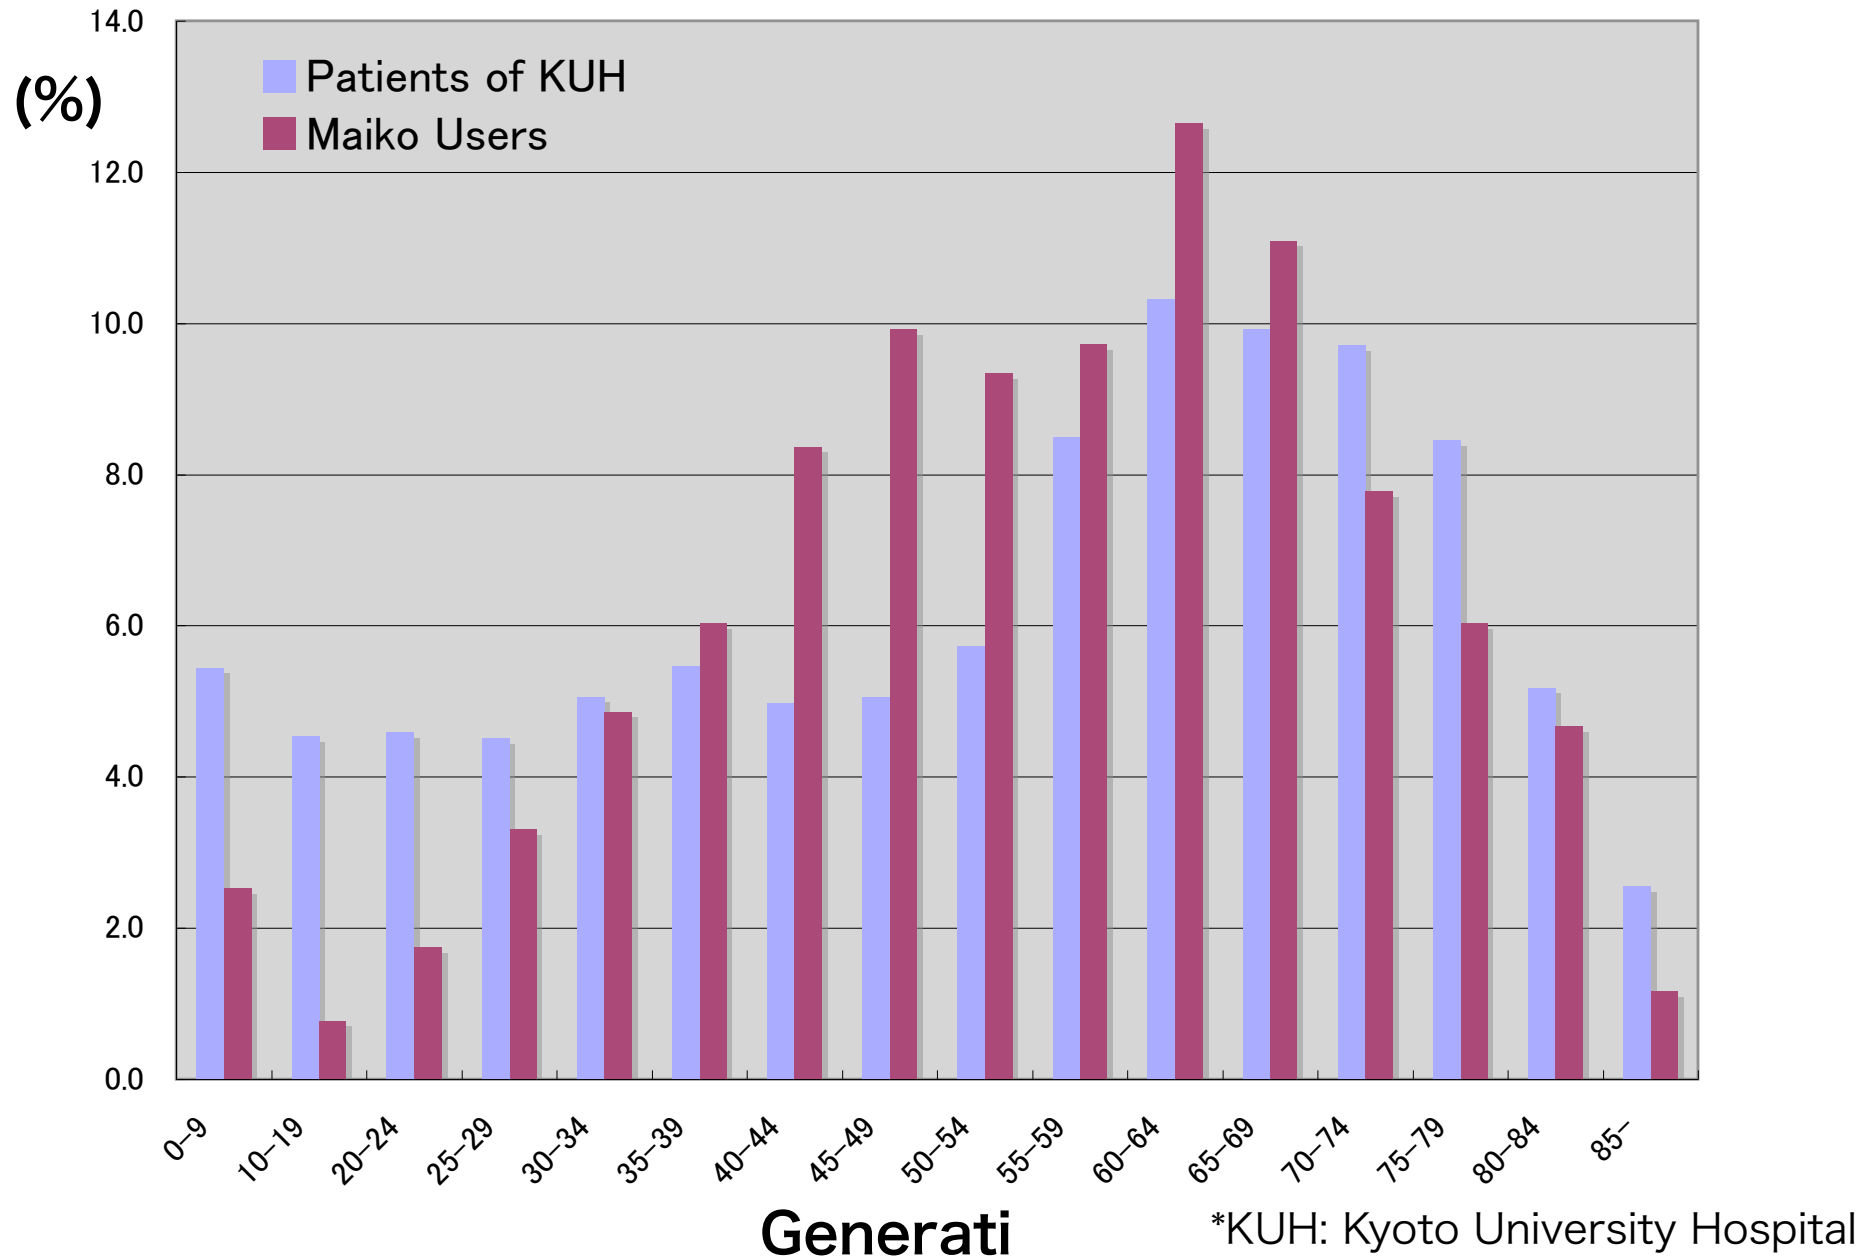

# Maiko Net

<http://www.e-maiko.net/>

Kyoto Association for Cooperative Medicine (Non Profit Organization)

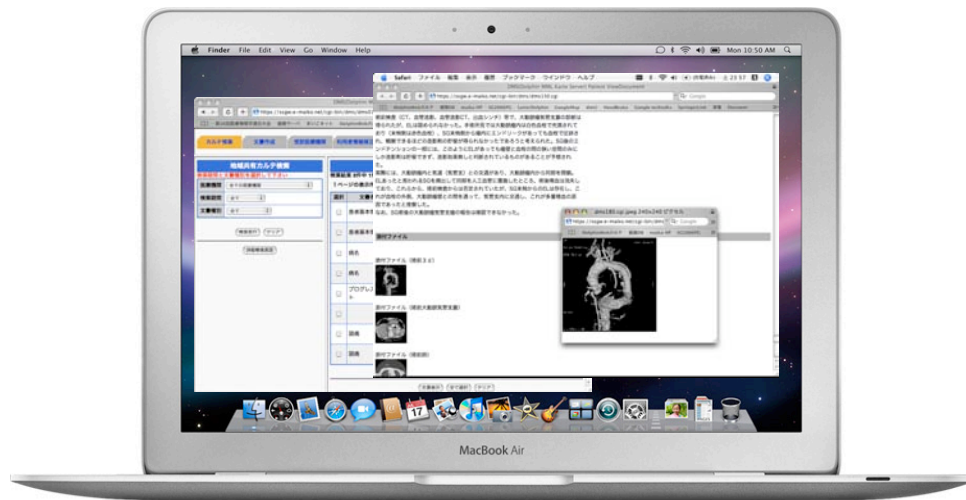

The screenshot shows a web browser window displaying the Maiko Net website. The browser's address bar shows the URL <http://www.e-maiko.net/>. The website header includes the Maiko Net logo and the text "Kyoto Association for Cooperative Medicine". Navigation links for "Home", "Gmail", "gCal吉原", "画像DB", "まいこ携帯", "まいこネット", "Googleチャンネル", "Evernote", and "www.ccrstandard.com" are visible. A search bar with the Google logo is also present. The main content area features a "まいこセンター個人口座" section with a "ログイン" button, a "医療機関向けサービス" section with a "サービスの利用" button, and a "特定非営利活動法人 京都地域連携医療推進協議会" section with a photograph of a traditional Japanese building. A "PR" section highlights "ISO/IEC27001-ISMS(情報セキュリティ) 認証取得を最後までサポートします" by Sun Partners Co., Ltd. A "携帯サービス 利用例" section shows a smartphone displaying the mobile service interface. A "お問い合わせ" section provides contact information for the association, including a phone number (602-0855) and address in Kyoto. A "新着情報" section lists recent news items, such as "2008.10.01 - 携帯サービス開始!" and "2008.10.09 English版 Current Status and Future of Dolphin Project". The footer contains a URL for a PDF document: <http://www.e-maiko.net/index.php?plugin=attach&refer=images&openfile=Dolphin2008j.pdf>.

# Age Distribution in Patients of KUH and Maiko Net Users

# DEMO

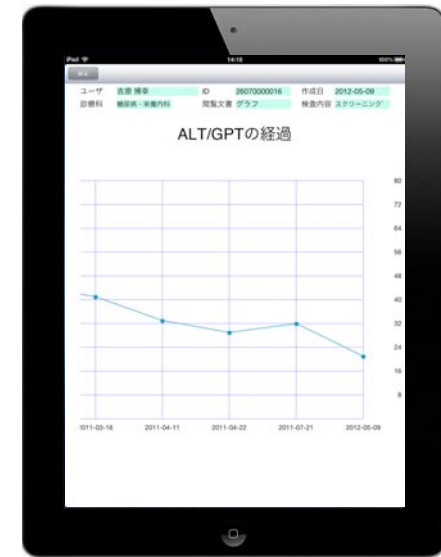

## Access to Maiko Net

Service for PC  
Since Jul. 2007...

Service for Mobile Phone  
Since Oct. 2008...

Service for Mobile Phone  
Since Apr. 2012...

# Conclusion

- Data center (iDolphin) in 3 region (=RHIO)
- Patients can access by PC, Mobile Phone & iPad
- Medical providers can access their patient's data (Cooperative medical care)
- Secondary use of clinical data (anonymous data)
- More than 10,000 users in Kyoto project including Nagahama area

# Thank you !
